### Weather

People often say: "Everything depends on the weather." But what does the weather depend on? Why do we have weather at all?

Behind all our weather – behind the warm summer days and cold winter days, behind the snow, behind the rain – is the sun.

All our life depends on the sun, and our weather depends on the sun, too.

The sun is very, very hot. The temperature of the sun is very, very high! It's good thing we are 93 million miles away from the sun!

Our planet – the Earth – turns around the sun. At the same time every 24 hours the Earth turns around its axis. This turning brings a change of temperature from day to night, it brings a change in our weather.
